Breck's
Bulbs AND Plants
FOR FALL PLANTING.
1905

TO OUR PATRONS

—1905—

WE respectfully request the attention of all who are interested in Bulbs, to the **GREAT EXCELLENCE** of those we have selected, and which are now displayed in great variety on our counters.

A large proportion of the best and most critical gardeners, florists and amateurs in New England, deal with us, and their demands are so extensive that **WE MADE OUR SELECTIONS VERY EARLY IN THE SEASON** from the most celebrated growers in Europe and elsewhere. Being the first on the field, we secured the best bulbs grown.

We are thus able to offer **VERY CHOICE, THOROUGHLY RIPENED, HAND-PICKED BULBS**, which alone produce the largest and handsomest flowers. Displays from such bulbs are exceedingly effective and beautiful, far surpassing those from the grade of bulbs usually imported and catalogued.

Our bulbs of **TULIPS, HYACINTHS, LILIES** and **DAF-FODILS** are of the greatest excellence, and we solicit inspection and comparison from purchasers and others.

Our importations are so large that we are able to sell **OUR HIGH GRADE BULBS VERY LOW**. Our prices are less than are charged by many dealers who do not regard quality as of first importance.

Early Orders are Solicited while our Assortment is Complete.

Respectfully,

JOSEPH BRECK & SONS

THIS is the season when we wish to call the attention of all lovers of flowers to our **Bulbous Plants.** These plants, low in cost and requiring no special skill for their cultivation, excel all others in giving brightness and fragrance to the home during the long winter. In the early spring those planted in gardens begin to bloom, so that it is possible, by means of a proper selection, to have flowers continually indoors from October to April, and outdoors from March to June. The flowers vary in color, form and size, and last well when cut. Many varieties of bulbs produce flowers year after year.

Snowdrops, Crocus, Scillas, Chionodoxa, and Eranthes planted in beds, in mixed borders, or in front of shrubbery, are the first to bloom outdoors, telling us that, even though the snow still lingers, spring has come.

Hyacinths next appear, either alone in beds, or alternated with Single Early Tulips, which blossom immediately after. By this time the Summer bedding should be set out.

Narcissus, of which we have about fifty varieties, Iris, Spirea, Lilies, and others of equal beauty, we recommend for planting in the Herbaceous border. They last well into the Summer.

Single Late or Florist's Tulips, Parrot Tulips, and Late Flowering Double Tulips deserve a more wide-spread popularity than they at present receive. Their beauty has only to be known to be appreciated.

We feel confident that if people were better acquainted with Winter and Spring flowering bulbs, the interest in and demand for them would be greatly increased.

TIME TO PLANT.—Bulbs intended for **FLOWERING IN THE HOUSE** can be potted when received and placed in a cool cellar or outhouse. A succession of bloom will be obtained by bringing them, as wanted, into a room where the temperature averages 70° during the day and 50° to 55° at night. **FOR OUTDOORS.**—The sooner, after the beginning of October, that bulbs intended for spring flowering in the garden are planted, the finer will be the flowers, because they make some root growth before severe weather sets in, and thus obtain food from the soil instead of exhausting themselves. The plain cultural directions given throughout this catalogue, will, we hope, be of service to many of our friends.

VARIETIES. All the varieties catalogued by us are distinct, possessed of real merit, and have made a place for themselves in the houses and grounds of the most skilled cultivators, as well as on the tables of the leading European and American exhibitions.

PRICES. The prices we quote, without regard to **SPECIAL OFFERS**, which see on page three of cover, will compare most favorably with those of any other firm offering an equal quality of goods.

NOTICE.—While we exercise the greatest care to have all Seeds, Plants, Bulbs and Nursery Stock of the best kind, we do not give, and our agents and employees are forbidden to give, any warranty, express or implied. If you do not accept these goods on these terms, you must return them at once, and all payments therefor will be refunded.

JOSEPH BRECK & SONS, CORPORATION.

HYACINTHS.

THE HYACINTH is the most popular, beautiful and fragrant of Holland bulbs. It is of almost every imaginable shade of color, and is suitable alike for house or garden culture.

POT CULTURE.—Plantings may be made at any time from September to December, though October is the best time. A light, rich soil with a mixture of well rotted cow manure, sand and leaf mould is most suitable; use a five-inch pot and have the top of the bulb just below the surface of the soil. After setting the bulb, thoroughly firm the soil and give a good watering. The pots should then be set away in a cool cellar or outhouse and covered over with coal ashes or some litter. When well rooted, which will be in about six weeks, they may then be brought as wanted for a succession of flowers into a moderately warm light room, or forced. To keep the foliage dwarf and obtain fine large flower spikes, Hyacinths when being forced should have plenty manure, water, fresh air, and be kept near the glass.

CULTURE IN GLASSES.—Generally the single varieties are most suitable for growing in water. They produce finer spikes of bloom and retain their beauty and fragrance longer than most of the double sorts. When it is desired to grow Hyacinths in water, they should be placed so that the base of the bulb *merely touches the water*. The glasses should then be set in a cool, dark closet, or in the cellar, until nearly filled with roots, when they may be brought into the light. Change the water frequently. Give as much fresh air as possible without letting the plants stand in a draught. It is of importance in growing Hyacinths in the parlor that the atmosphere in which the plants are growing, be kept moist, and as nearly as possible at a temperature of from sixty-five to seventy degrees.

OUTDOOR CULTURE.—The bulbs may be planted any time after the beginning of October and before the winter frosts set in. Any good, well-drained garden soil will answer. Dig deep and mix in a little decomposed manure; set the bulbs from four to five inches below the surface, and about six inches apart; after the ground becomes frozen, give a good covering of stable litter. In spring, about two weeks after the flowers have faded, the bulbs may be lifted, cleaned, packed in a box of dry sand and stored away in a cool place until wanted again for planting in the fall.

ROMAN HYACINTHS.

These early flowering and easily forced bulbs are favorites with florists, who find a ready market for the flowers in all the larger cities. Successive plantings can be made and a continuance of bloom obtained from November to May. The method is to place the bulbs thickly together in pots or shallow boxes, place these in a cold frame, or outhouse, covering them up so they cannot get severely frozen. In four or five weeks they may be brought in to force, which should be done gradually, beginning with a temperature of 50 degrees and advancing to 70 degrees. A succession of flowers is obtained by bringing in the boxes as occasion demands. The flowers of Roman Hyacinths, white, red and blue, are smaller than those of the Dutch Hyacinth, but each bulb usually produces from two to three spikes.

See Special Offers on Third Page of Cover.

HYACINTHS

BRECK'S HAND PICKED BULBS. Are all of flowering age, thoroughly matured and the finest varieties in cultivation.

WE INVITE COMPARISON

NOTE.—As the single Hyacinths give the most satisfactory results, we always send a larger proportion of single than double, unless specially ordered to the contrary.

Price for our selection of single and double sorts, all colors, splendid varieties,
\$1.25, per doz.

SINGLE RED, ROSE AND PINK

	\$0.25
	\$2.00

HYACINTHUS CANDICANS.

A perfectly hardy, elegant border plant that grows to a height of four feet. The pure white, drooping flowers are borne on a central stem, and are produced in July and August. Strong roots 5 cents each; 30 cents per doz.; \$1.75 per 100.

Feather Hyacinths.

See Special Offers on Third Page of Cover.

TULIPS.

Fine form, brilliant colors, sweetness, early flowering and easy culture all tend to make the Tulip a favorite and the glory of our gardens in Spring. It is perfectly hardy and will withstand any amount of freezing, without injury, but to protect it from the mechanical action of freezing and thawing, a mulch of leaves or litter should be spread over the beds as soon as the ground is frozen. While tulips are not very particular in the matter of soil, doing well in any kind that is not wet, from a light, sandy loam to a heavy clay, yet a rich medium loam will give the best results. It is a good plan to crown up the beds in which they are to be planted so that the water will run off. October is the best month to plant, but any time after September and before the ground freezes will answer. Have the top of the bulb four inches below the surface, and set five inches apart each way. When the leaves begin to turn yellow, after the flowering, the bulbs may be taken up and replanted thickly in a shady location, or set in boxes of earth until thoroughly ripe. They should then be dried and put away in paper bags until wanted again for planting in the Fall.

CULTURE IN POTS OR FLATS. Use ordinary garden soil, set three bulbs in a five inch pot, or a dozen bulbs in a ten or twelve inch flat or pan; have the top of the bulb just even with the surface of the soil; after watering thoroughly, plunge the pots in a cold frame or set in the cellar and cover with coal ashes or sand. They may be brought into the house for forcing about the middle of December, and thereafter at intervals of two weeks, for a succession. With plenty of light, water and air, they will begin to bloom in about six weeks, in the ordinary living room.

All Single Early Tulips are suitable for pot culture. The Duc Van Thol Tulips are the earliest, and especially suitable for growing indoors.

NOTE.—To assist our customers in making proper selections for beds, etc., we prefix to the several sorts, letters and figures which indicate their comparative time of flowering, height in inches, and varieties which are suitable for growing together.

The letters A, B, C and D show, comparatively, the respective times of blooming.

The figure first following the letter is the height in inches. When a second figure appears, it means that all the kinds to which this same figure is prefixed, are suitable for planting in combination.

Example:—

- B-9-2. Alba Regalis, white
- B-9-2. Artus, bright scarlet
- B-7-2. Bizard Verdict, brown and yellow

bloom at the same time, and produce a beautiful contrast. The dwarf (7 inch) sort should be planted as a border to the two taller kinds.

THE BULBS WE OFFER ARE ALL OF THE HIGHEST GRADE, CAREFULLY SELECTED, AND WILL, UNDER REASONABLE CONDITIONS, GIVE PERFECT SATISFACTION.

The kinds which have an asterisk () prefixed are especially suitable for exhibition.*

See Special Offers on Third Page of Cover.

TULIPS—Continued.

SINGLE EARLY DUC VAN THOL TULIPS.

This is the earliest class and especially suitable for indoor culture. They may be had in bloom by the beginning of December.

JOSEPH BRECK & SONS, CORPORATION,
BOSTON, MASS.

GENTLEMEN:—Kindly book my order for Bulbs for the coming season. The varieties received from you last Fall were magnificent, and the results were far beyond my expectations; every Bulb bloomed at the same time, and were the admiration of the neighborhood.

Sincerely yours,

SOMERVILLE, MASS., Sept. 1, 1905.

ALEXANDER WALLACE.

BOSTON PUBLIC GARDENS.

We continue to supply our customers the same quality and varieties of tulips as used by Mr. Doogue in the Boston Public Gardens. And for the benefit of those who may wish to secure a similar effect another season, we give, in part, Mr. Doogue's arrangement of kinds:—

No. 1. JOOST VAN VONDEL, white, centre mass. JOOST VAN VONDEL, cherry red, flaked with white, for edging.

No. 2. ROSE LUISANTE, deep rose, centre mass. STANLEY, rich claret, for edging.

No. 3. COULEUR DE CARDINAL, rich bronze red, centre mass. STANDARD ROYAL GOLD STRIPED, for edging.

No. 4. PROSERPINE, rich dark rose, centre mass. ROSE GRISDELIN, delicate rose, flushed white, for edging. Other specially beautiful sorts are: VERMILION BRILLIANT, PRINCE OF AUSTRIA, THOMAS MOORE, WHITE SWAN, KAISERS KROON and STANDARD ROYAL, all elsewhere described in this catalogue.

Should any of our customers wish an experienced man to lay out their grounds or plant bulbs, we can recommend one of large and varied experience in work of this kind.

See Special Offers on Third Page of Cover.

CROCUSES.

Plant during October or November, in clumps or masses, three inches deep. If planted along the border of the lawn they can be combined with snow-drops, scillas, daffodils, etc. They are perfectly hardy and may remain in the ground undisturbed for years. Crocuses are easily forced. They should be planted very thickly in pots, flats or shallow boxes, filled with good light soil not too much packed down. The top of the bulb should be just below the surface. The Crocus may also be grown in glasses or in flat dishes with sand, moss or cotton batting as a foundation. Keep the material in which they are set constantly moist and growth will soon begin.

A Natural Bed of
Narcissus Poeticus

NARCISSUS OR DAFFODILS.

Next to the Tulip the Narcissus is the most popular spring-flowering bulbous plant. Within a few years florists have learned how easily they will force, and what a wealth of form and color they possess, so now they are generally to be seen in the florists' windows by Christmas.

With few exceptions the Narcissi are hardy and strong, growing under ordinary cultivation. The bunch flowered or Polyanthus sorts, however, should not be trusted to the border. Our list of sorts is very complete, and our prices ought to induce flower lovers to plant them in quantity.

OUTDOOR CULTURE. The Daffodil will grow in any ordinary garden soil and in almost any situation, but prefers moderately stiff, well-drained soil, in situations slightly shaded, such as the herbaceous border and the margins of flower-beds, along the outside edges of shrubberies, on woodland walks and on the margins of lakes and streams, or for naturalizing in the grass or woodland. Planting may be done in the fall any time before the frost sets in, October being the usual month for doing this. Once planted they should not be disturbed further than dividing and resetting in August once in three or four years, when they get too crowded. The varieties marked H. are hardy; those marked HH. are hardy with a good covering of leaves or litter during winter; the kinds marked T. are tender, and most suitable for growing indoors.

POT CULTURE. It is unnecessary to say anything as to the merits of Narcissus of all kinds for this purpose, as their popularity is universal. At the head of the list stands the Tazetta, or Polyanthus Narcissus, with its large bunches of fragrant flowers.

"The Bulbs I received from you last fall have given me better bloom than any I ever raised before indoors."

NEWBURYPORT, MASS.

(Miss) ETHEL PARTON.

NARCISSUS—Continued.

Narcissus Horsfieldii.

The *Paper White Grandiflora* and *Double Roman Tazettas* are very largely used for forcing. All the varieties of the group are suitable for this purpose, and most excellent for cut flowers. The *Bulbocodium* or *Hoop Petticoat Daffodil*, planted say 3 to 12 in a pot, is most unique and attractive, and the same may be said of the *Narcissus Horsfieldii*. The *Campernelle* or *Large Jonquil* (*N. Odorus*), and the *Single and Double Sweet-Scented Jonquils* are splendid—the last mentioned being exquisitely perfumed. *Triandrus*, the little *Cyclamen Flowered Narcissus*, is a perfect gem, one of the choicest things we offer. The *Moschatus* and other *Spanish Daffodils* are also worthy of special mention. For culture, the hints given under hyacinths may be followed. One very important point is to keep them cool for the first four or five weeks when they are commencing to grow. After the roots are grown and the tops well started, they may be pushed forward more quickly in heat. In cutting for sending to friends or for market, the flowers should be cut in the bud, and when placed in water they will open out beautifully.

LARGE TRUMPET NARCISSUS

	Per doz.	Per 100	Per 1000

CHINESE NEW YEAR'S LILY.

The Genuine

KUM-YUENG-FONG-CHOP.

No care whatever is required in the cultivation of this beautiful and interesting bulbous plant. Use shallow dishes about three inches deep, into which put about one inch of grayel. Set the bulbs on this and fill in with small stones or pieces of marble to keep them upright, and keep the dish full of water. These bulbs do not require to be put in the dark, but a little shading until the leaves begin to grow is beneficial. A pinch of wood ashes now and again, and when changing the water, putting a few drops of ammonia into it will largely ensure success. 10 cts. each; \$1.00 per doz. net.

LILIES.

*Lilium Harrisii*

would notice particularly, *Auratum*, *Speciosum*, *Longiflorum*, *Harrisii*, *Tenuifolium* and *Candidum*. Other excellent sorts for pots are *Browni*, *Krameri*, *Chalcedonicum*, *Batemaniae*, *Wallacei*, *Monadelphum*, etc.

Everything considered, there is no class of hardy flowering plants so desirable as the Lily family. Their cultivation is not difficult, nearly all of the varieties being hardy and flourishing in ordinary garden soil. We recommend deep planting, from nine to twelve inches, according to the size of the bulb and depth of soil. When it is practicable to obtain peat, or leaf mould and sand in which to grow them, better results will follow.

POT CULTURE. The best compost to use is loam and peat in about equal parts, with the addition of a sprinkling of sharp sand and powdered charcoal. Select a large-sized pot, say an 8 or 10-inch, so as to allow of deep planting, a most essential matter where there are upper roots to be protected. Dust a little charcoal about the bulb to keep it fresh, and cover at least two inches with soil. Water lightly until the shoot begins to appear; never apply liquid manure of any kind unless as a stimulant, when just about to flower. Among the varieties worthy of special mention for growing in pots, we

FORCING SORTS.

LILIUM HARRISII. (*Bermuda Easter Lily*.)

Pot bulbs as soon as received, using pots about twice the diameter of the bulb. If planted in August and pots set out doors with a covering of 4 to 6 inches of litter, they will be rooted and ready to bring into the house by October, where, if they are kept in a temperature of from 55° at night to 70° during the day, they will be in flower by Xmas. A succession of bloom is obtained by bringing into the house a supply as wanted, but bear in mind that *Harrisii* is not hardy, and requires protection if kept out doors after cold weather sets in.

Extra care is exercised in securing our stocks of Bermuda grown bulbs. All are produced under contract especially for us. They are the very finest stocks the Islands afford and are thoroughly matured before shipment is made.

	Each	Per Doz.	Per 100

LILIUM LONGIFLORUM. (*Bermuda Grown*.)

The Bermuda grown Longiflorum, grow somewhat taller and produce a greater number of flowers than do bulbs of the same variety from Japan.

	Each	Per Doz.	Per 100
FIRST SIZE FLOWERING BULBS. 5 to 7 in. circ.	\$0.15	\$1.25	\$ 8.00
LARGE SIZE FLOWERING BULBS. 7 to 9 in. circ.	.20	2.00	15.00
MAMMOTH SIZE FLOWERING BULBS. 9 to 11 in.	.40	4.00	30.00

LILIUM LONGIFLORUM. (*Grown in the Azore Islands*.)

The Azores is a new source of supply for Longiflorums. There, the bulbs ripen a little later than they do in Bermuda, but their somewhat slower growth and the fact that as yet all have been allowed to thoroughly mature before being harvested, has prevented any appearance of disease so far. The plants are of sturdy growth and produce more flowers and of greater substance than do the bulbs from Bermuda and Japan.

	Each.	Per Doz.	Per 100

LILIUM CANDIDUM.

The Madonna Lily or Old English White Garden Lily.

For several years the French grown, *L. Candidum* bulbs have generally been diseased, weak, and produced thin petals. The bulbs we offer are grown in the Azore Islands. They are larger in size than any that are received from France, and so far they have been entirely free from disease. They produce more flowers of greater size and substance than the French bulbs, and we confidently recommend them as being in every way superior.

	Each.	Per Doz.	Per 100
MAMMOTH AZORE GROWN BULBS.	\$0.15	\$1.00	\$5.00

See Special Offers on Third Page of Cover.

LILIES FOR THE OPEN GROUND.

BRECK'S LILIUM CANDIDUM, or Old English Lenten Lily, growing on W. H. Ames' Estate, North Easton, Mass.

As many of the late-flowering and ripening sorts cannot be shipped from Japan until October, we suggest to our customers who wish to plant them in the autumn, that they have the beds prepared and kept covered with leaves or light litter to prevent the ground freezing until the bulbs arrive.

	Each	Per Doz.	Per 100
AURATUM. (<i>Golden Rayed Lily of Japan.</i>) Ivory white ground, thickly strewn with purple studs; the centre of each petal has a band of light golden yellow, extending from tip to base. The most magnificent of lilies . . .	\$0.20	\$1.50	\$9.00
BATEMANIÆ. Clear orange apricot, without spots, six to eight flowers borne on a stem four feet high30	2.50	15.00

WALLACEI. Glowing apricot, freely spotted with black; three feet	.15	1.50	10.00

LILY OF THE VALLEY.

(*Convallaria*.)

For open ground planting we supply either clumps or pips. The clumps should be set from six inches to one foot apart, and covered three inches deep. If pips are planted, set them to the same depth but quite thickly (every pip produces a flower). They prefer ground which is rather moist and partially shaded.

For growing in the house or for forcing, pips are by far the best, as they have more vigor and will bloom earlier. About one dozen pips should be planted in a six-inch pot. Carefully preserve all the fibrous roots, and keep the crowns or buds above the soil, cover the tops of the pots with loose moss, place them in a temperature of about 80 degrees, keep constantly moist with tepid water; they should produce flowers in from four to five weeks.

CHOICE SELECTED BERLIN PIPS, for early forcing.

Per Doz.	Per 100	Per 1000	Per Case of 2000
\$0.35	\$2.50	\$20.00	\$35.00

See Special Offers on Third Page of Cover.

 In the following Alphabetical List we have indicated the late ripening sorts by prefixing a star (*). These kinds cannot be sent out until November.

AMARYLLIS.

Amaryllis Equestris

Bulbous plants with large, drooping, bell-shaped, lily-like flowers, varying in color from the richest crimson to the pure white, striped with crimson or scarlet. The *Hippeastrum Hybrids* (*Vittata*), are magnificent pot plants, thriving well in an ordinary parlor. They should be in every collection. None of them will stand the winter out of doors, but some of them may be planted out in May and will flower quite freely during the summer months. As pot plants for parlor and conservatory decoration during winter, they are probably unsurpassed by any other genus.

It should not be forgotten by growers of Amaryllis that nearly all the varieties are evergreens and while they want a season of rest after flowering they never should be neglected or allowed to become so dry as to destroy the roots. After being potted in the fall they should be kept in a temperature of about 45 degrees, and with only a little water until January when they should be given more heat, light and water. As soon as the flower stalks appear weak, cow manure water may be applied. A heavy loam enriched with bone dust and cow manure suits them well.

	Each	Per Doz.	Per 100
BELLA DONNA (<i>Bella Donna Lily</i>). White, flushed with rosy purple	\$0.30	\$1.75	\$12.00
EQUESTRIS. Scarlet, with broad white stripes, extending from the throat to halfway up the segments	.50	5.00	
FORMOSISSIMA (<i>Jacobean Lily</i>). Velvety crimson, a desirable border plant.	.15	1.25	10.00
HIPPEASTRUM HYBRIDS (<i>Vittata</i>). Without doubt the finest race of Amaryllis in existence. The bulbs we offer are from the two most famous English strains. They exceed in size, form of flowers, variety of colors and diversity of markings, all other strains. The segments being of nearly uniform size, give the flowers a regular trumpet form	.75	6.00	
JOHNSONII (<i>Barbadoes Lily</i>). Deep red and white.	.75	7.00	
LONGIFLORA, ALBA AND ROSEA.	.15	1.25	8.00
LUTEA (<i>Sternbergia, Mount Etna Lily</i>). A handsome, showy, yellow, autumn flowering bulb	.10	.75	3.50
VALLOTA PURPUREA (<i>Scarborough Lily</i>). Large, crimson scarlet, lily-like flowers, in heads of five or six blooms each, which remain a long time in perfection	.40	3.00	
ZEPHYRANTHES ROSEA. Very fine; produces large flowers of a deep rose color	.05	.35	2.00
ZEPHYRANTHES TREATEA (<i>Fairy Lily</i>). A native of Florida and has recently been introduced to cultivation, and is known as the "Fair Lily." The flower stalks vary in length from seven to twelve inches in height. The flowers are solitary, strong bulbs often giving two or more flowers, which are pure white and deliciously scented	.05	.35	2.00

ADONIS VERNALIS.

A hardy perennial border flower, blooming in May. It has beautiful, cup-shaped, yellow flowers, and many-parted, delicate foliage. Cultivation easy, in any good garden soil; light, moist earth preferred. They thrive either in full sun or partial shade. 5 cents each; 50 cents per dozen; \$3.75 per 100.

*AGAPANTHUS (*African Lily*.)

One of the best known of the half-hardy liliaceous plants. They should be grown in pots or tubs, in soil same as recommended for Hyacinths. They will bear forcing in the greenhouse, but are especially suitable for piazza or terrace decoration. The large umbels of twenty or thirty blossoms appear in the Summer and Autumn.

	Each	Per Doz.
UMBELLATUS. Blue	\$0.15	\$1.50
UMBELLATUS ALBUS. White	.15	1.50

See Special Offers on Third Page of Cover.

ALLIUM.

These beautiful and desirable plants belong to the *Garlic* family. The kinds we catalogue are all suitable for pot culture, as well as for the border. The two sorts to which we affix the letters HH should have a protection of leaves or litter during winter. There is no objectionable odor attaching to the following sorts,—instead some of them give forth a very sweet fragrance. The treatment accorded Hyacinths, either indoors or in the garden, is suitable for the Allium.

	Per Doz.	Per 100	Per 1000
AUREUM (<i>Moly Luteum</i>). Hardy spring flowering border plant, with bright yellow flowers	\$0.15	\$0.75	\$5.00
AZUREUM. Deep azure blue. Very showy	.50	3.75	
HERMETH GRANDIFLORUM, HH. Large, clear white, sweetly scented flowers. The best for forcing	.15	1.25	8.00
NEAPOLITANUM, HH. Pure white flowers. Much used for forcing	.15	1.00	6.00

ANEMONES.

These beautiful spring flowers are equally adapted for garden and pot culture. For garden culture plant the bulbs in any good, rich garden soil, about four inches apart, in clumps or masses, and before the ground freezes cover thoroughly with leaves and other litter as a winter protection. For pot culture, use six-inch pots which will hold four to six bulbs. Cover one inch deep and keep moderately cool. Give but little water until growth begins. Florists now use these by the thousands for winter forcing.

	Per Doz.	Per 100	Per 1000
SINGLE Finest Mixed	\$1.15	\$0.75	\$5.00
—BLUE. (<i>Helena Maria</i> .)	.20	1.00	6.00

—ROSE. (<i>Rosette</i> .) Dark pink	.35	2.50	20.00
—CHRYSANTHEMUM FLOWERED. The best double	.35	2.25	17.00
—ST. BRIGID. (<i>Irish Anemone</i> .) Semi-double; shades of scarlet, blue and purple; fine for cutting	1.00	8.00	
	.50	3.50	

ARUM.

These are curious and interesting ornamental plants, with calla-shaped leaves and flowers. A. Sanctum is tender, and suitable only for pot culture; the other three sorts will winter outdoors if protected with a good covering of leaves. Plant the tubers sufficiently deep that roots may form from near the tops; give rich soil, partial shade, and water freely when in growth or bloom.

	Each	Per Doz.
DRACUNCULUS. (<i>Dragon Flower</i> .) Large purple flowers, and curiously marbled small palm-like leaves	\$0.20	\$1.50
ITALICUM. Spotted yellow, or creamy white; leaves veined with white	.05	.40
MACULATUM. Leaves spotted with white; large white calla-like flowers	.15	.85
SANCTUM. (<i>Black Calla</i> .) Sweet-scented; about one foot in length and six inches broad; dark purple color	.20	2.00

Arum Sanctum.

See Special Offers on Third Page of Cover.

ANOMATHECA CRUENTA

Sometimes called the *Scarlet Freesia*. It is suitable for pot culture; grows about one foot high. The flowers are scarlet, spotted with crimson. They are summer blooming, and will winter out doors if given a good covering of leaves during winter.

Per Doz. Per 100

\$0.20 \$1.00

ANTHERICUM.

Suitable for the border or pots. If grown out-doors they should have some protection during winter; if in pots, keep in a cool room, or greenhouse; they are very useful for lawn vases, and excellent for cutting.

Per Doz. Per 100

LILIAGO MAJOR. (*St. Bernard's Lily*.) White; height 2 feet . \$0.50 \$3.00

LILIASTRUM. (*St. Bruno's Lily*.) White, lily-like flowers, borne in early summer on stalks about eighteen inches high .50 3.00

BABIANA.

Dwarf-growing, spring-flowering plants, especially suitable for the greenhouse. Plant six or eight bulbs in a six-inch bulb pan; they are not hardy but do fairly well out doors in a warm dry border, planted in sandy loam and thoroughly protected from frost.

25 cents per dozen; \$1.50 per 100.

BRODIAEA.

These are showy, hardy, bulbous-rooted plants, natives of California. They bear clusters of long, tubular-shaped flowers of a bluish purple shade. A light, loose, well drained, sandy or loamy soil best meets their needs, and an excess of moisture or very rich soils are to be avoided. A protection of leaves should be given in winter. They do well as pot plants. Height about one foot.

GRANDIFLORA, 25 cents per dozen; \$1.50 per 100.

Babiana.

CALLA.

(*Richardia*.) (*Lily of the Nile*.)

A rather warm temperature is desirable for Callas. Use very rich soil, and give an abundance of water when growing. They may be kept growing continually, or given a season of rest, as desired. The yellow variety seems to do best when grown without a resting period. Plant in eight or ten-inch pots, and start into growth towards end of summer.

Each Per Doz. Per 100

ÆTHIOPICA (*White Calla*.) Extra selected roots, 2 to 2½ inches . \$0.35 \$2.50 \$20.00

LITTLE GEM. Similar to the above, but of smaller, dwarfer habit, height about one foot, and bears many flowers, half the size of those of the ordinary White Calla .25 2.75 21.00

ELLIOTTIANA (*Yellow Calla*.) Flowers deep yellow. A splendid sort. 1.00 11.00

BLACK CALLA (*See Arum Sanctum*).

See Special Offers on Third Page of Cover.

CALOCHORTUS.*(California Butterfly Tulip or Mariposa Lily.)*

This genus contains some of our gayest and most beautiful half-hardy bulbs. The flowers resemble a Tulip somewhat in shape, and are of brilliant colors, including white, lilac, crimson, yellow and blue, many being veined, spotted or edged with deep yellow. They succeed well when grown in pots. Those on our list are all perfectly hardy so far as extreme cold is concerned, but they will not withstand alternate thawing and freezing so well. If to be grown outdoors, they should be planted in the fall, and it is better to plant late so that leaf growth is delayed until spring. A light, rich soil and perfect drainage is best. Cover with leaves after ground is frozen. When the bulbs have ripened it is best to take them up and replant in the fall.

Calochortus.

CAMASSIA.*(The Quamash of the Indians.)*

An excellent border plant, especially effective when grown in clumps. The flowers are produced in long, graceful, loose racemes; color, blue or purple. 15 cents per dozen; \$1.00 per 100.

CHIONODOXA.*(Glory of the Snow.)*

The most attractive and desirable of the dwarf, blue, hardy spring flowers. It somewhat resembles the *Scilla Siberica*, but is larger, taller, and more showy. It will thrive in any kind of soil, and almost any location. The bulbs continue to bloom year after year without deterioration. *Chionodoxa* is suitable for pot culture and forces fairly well.

Freesia.

FREESIA.

One of the best known and most esteemed cape bulbs. It is very suitable both for parlor culture and for forcing for cut flowers. The flowers are tube-shaped, pure white, blotched with yellow on the lower petal, and borne on a slender branching scape from twelve to twenty inches high. It has a very delicate, sweet perfume, is easily forced, and remains fresh a long time, thus rendering it valuable as a cut flower; if cut when only two flowers are out the rest will open. Plant in light soil from August to October. Water well at first, then rather scantily until the plants are well started. When growth begins to be vigorous, water freely and set the plants in a sunny place in the greenhouse or parlor. After flowering, the bulbs should be stored in a dry place until another planting season.

	Per Doz.	Per 100	Per 1000

NARROW LEAVED. Mixed40	2.50
NARROW LEAVED. Pure white; very beautiful50	3.00

See Special Offers on Third Page of Cover.

Gladiolus, The Bride.

***GLADIOLI.**

The following are early flowering, hardy sorts, but if planted outdoors a dry spot should be selected and a good covering of leaves given to prevent thawing and freezing. They force readily and are extensively used by gardeners and florists; the dwarf, gracefully-formed spikes of flowers being excellent for cutting. If cut and placed in water when the first flowers open, the colors will be purer and the buds will keep expanding and remain beautiful for a week or more. Half a dozen bulbs should be planted in a six-inch bulb pan or pot; cover the bulbs to a depth of one and a half inches.

	Per Doz.	Per 100	Per 1000
BLANDUS. Pale rose; very early	\$0.40	\$3.00	
COLVILLE ALBA. (<i>The Bride</i> .) The florists' favorite for forcing; flowers pure white. If planted outdoors and protected from frost they commence to bloom in July	.30	1.60	12.00
—ROSEA. A new and beautiful variety. The flowers are delicate pink	.30	1.60	
—RUBRA. Purple, striped lilac	.15	1.00	7.00
RAMOSUS MIXED. Salmon, rose and white	.25	1.50	9.00
—QUEEN VICTORIA. Scarlet and white	.60	4.50	

GLOXINIAS.

Our strain is an exceedingly fine one; the colors being very varied, some of them intense, glowing crimson, some purple, some pure white, others richest lilac, and some with various shades blended. They cannot fail to give great satisfaction.

Gloxinias may be started into growth any time during the fall and winter months. Tufty loam, peat and sand or powdered charcoal is the best soil. Care should be taken that the pots be well drained. Little water is needed until the plants commence to grow at the top; merely syringing around the pots to keep the soil from getting too dry. After growth begins, water copiously, morning and evening, with tepid water. Give a light, airy position, shading slightly from the sunshine. A moist temperature of about 65 degrees suits them best, and even a little cooler during flowering time so as to preserve the blooms longer. Use five or six-inch pots and only slightly cover the bulb.

	Each	Per Doz.	Per 100.
CHOICEST SORTS. Mixed, flowering bulbs	\$0.10	\$0.75	\$6.00
“ “ Extra large bulbs	.20	1.75	12.00

*** HELLEBORUS NIGER.**

(*The Christmas or Lenten Rose*.)

Not subject to either of our special offers.

A beautiful nearly hardy herbaceous plant, flowering in great profusion early in spring, and if grown in the house or in cold frames will bloom during the Christmas holidays. The flowers, two to three inches in diameter, are white, with purple, red or rose shading, making them charmingly beautiful. Outdoors, a moist, well-drained situation is preferable. They like a rich, coarse loam, and do well in shrubby borders. They will force under glass. Strong plants should be taken up into large pots and gradually inured to a warm temperature. Blossoms may thus be produced at any time desired in winter. 40 cents each; \$4.00 per dozen; \$25.00 per 100.

HEPATICA.

Pretty, dwarf, early spring flowers. They prefer shade, but do fairly well in open places. They should remain undisturbed from year to year, in rich, well-drained loam. Plants kept in pots in a cold frame until mid-winter will quickly bloom at any time desired, if removed to a warm room or greenhouse.

	Each	Per Doz.	Per 100
BLUE, Single	\$0.15	\$1.50	\$10.00
RED, Double	.15	1.50	10.00

IRISES.

(*Fleur de Lis*.)

Elegant, free-flowering plants, of many diverse colors, combinations and forms. They are hardy (with two exceptions, *Pavonia* and *Susiana*), and very suitable for planting in front of shrubbery, in the herbaceous border or mixed beds. By planting the four classes we here list, a succession of bloom can be had from May until well on in the summer. They require rich soil and abundance of water. After planting they should not be disturbed, as the old strong clumps produce the best quality and greatest number of flowers. It is best to plant in clumps of half a dozen or more.

See Special Offers on Third Page of Cover.

German Iris.

IRISES—Continued.

IRIS HISPANICA (*Spanish Iris*).

The flowers of this species are very beautiful and of many colors, including pure white, yellow, bronze, blue and purple. They are quite fragrant, and usually appear in June. They are said to be perfectly hardy, but a covering of leaves is recommended as a protection. Florists now use a great many of these for forcing, and find a good market for the beautiful Orchid-like flowers.

MONT BLANC. Large, pure white flowers.	\$0.60	\$3.75	\$30.00
SUPERFINE MIXTURE	.40	2.50	15.00

IRIS GERMANICA. (*German Iris*.) (*The True Fleur de Lis*.)

The flowers are large and showy, and produced so freely that the plants in May are a mass of blue, yellow, purple, white, and all the shades that these colors combine to produce. This species is perfectly hardy, but a winter covering of leaves or coarse litter is an advantage. They prefer a rather heavy, moist soil, but do well in almost any soil or situation. Planting may be made either in Autumn or Spring. Set the tubers about one foot apart each way.

*IRIS KÆMPFERI. (*Japanese Iris*.)

This forms a distinct type, and is the most desirable of all for garden decoration. The plants are vigorous growers, and perfectly hardy. In good soil, the flower stalks will often grow to a height of four feet, and carry an abundance of bloom. The flowers are proportionately large; they open flat, are from six to ten inches in diameter, both single and double in many shades of color; pure white, dark purple, maroon, violet, plum, yellow, beautifully blotched, pencilled and marbled. For best results with these, the soil should be moist, deep and rich. While they do well in the open, some shade on the south and west will prolong the duration of bloom and improve the colors. The roots should be divided every three years. In doing this, it is best after the third year from planting to divide a portion every year, as it takes one year to make strong crowns for the next year's flowers.

ISMENE.

Fragrant, free-flowering plants, excellent for pot culture. They require a strong, loamy, well-drained soil, and plenty of pot room. Plant the bulb just under the surface and give plenty of water — keeping always carefully moist.

ISMENE CALATHINA. (<i>Sea Daffodil</i> .) A very stately and ornamental plant, bearing large, white, trumpet-shaped flowers, delightfully fragrant	Each	Per Doz.
	\$0.10	\$1.00
ISMENE UNDULATA. Pure white, beautifully fringed; a delicate and showy plant	.10	1.00

IXIA.

Ixia.

Very beautiful, easily grown Cape of Good Hope, bulbous plants, that are especially suitable for parlor and greenhouse culture, and may also be grown out of doors. They attain an average height of about one and a half feet. The range of colors include, white, yellow several shades, orange, rose, lilac, pink, purple crimson, pale blue and ruby red. Some of the flowers are of one color only, but the majority of them have an eye or centre of a different color.

If grown out doors planting should be delayed as long as possible, so that growth may not begin in the fall. November is the best month. Set the bulbs three inches deep, in a cushion of sand. Give the bed a thick covering of leaves or dry litter. April is the usual month to uncover, but as the young shoots are tender when they first appear, a possible frost should be guarded against by a slight covering of litter until chilly nights are passed. The bulbs should be taken up in July and stored in drawers or paper bags until planting time.

In pot culture, use five or six-inch pots; set from five to ten bulbs, one inch deep. A sandy loam and leaf mould is the most suitable soil. After planting, store the pots under a bench in a cool greenhouse or in a rather dark cellar, at a temperature of 45 degrees. They need no water until growth has started. Then water carefully until the flowers come. While flowering water freely. The change from the cellar should be in January to a temperature of 50 degrees, which may be increased to 60 degrees by March, if the blossoms are wanted early.

CRATEROIDES MAJOR. Large, bright scarlet flowers	Per Doz.	Per 100.

POTTSH. Orange, flushed with red

.15 .75

ROSEA. Beautiful salmon rose

.25 2.00

.10 1.00

NIRENE. (*Guernsey Lily.*)

One of the most popular groups of the Amaryllis family. They flower in the fall and produce their leaves during the winter. The plants should be allowed to rest from May to August. They enjoy abundance of water, both at the root and overhead, and this treatment should never cease until the leaves begin to turn yellow. Use small pots and do not disturb, even though much pot bound, for it is when in this condition that they flower best.

CRISPA (*Undulata*). Flowers pale pink, much crisped at the edgeEach Per Doz.
\$0.75 \$ 6.00

FOTHERGILLI MAJOR. A strong growing, free blooming variety, with large crimson-scarlet flowers

1.00 10.00

SARNIENSIS. Rich salmon red

.40 4.00

ORNITHOGALUM. (*Star of Bethlehem.*)

ARABICUM. The finest of the species, suitable for house culture and forcing; it also makes a fine display in the garden. The flowers are large, pure white, with a black centre. In pots they should be given the same treatment recommended for Hyacinths. They should not be planted outdoors until Spring, as they will not withstand our winters; 5c. each; 50c. per doz.

UMBELLATUM. Early flowering, hardy sort; large clusters of white, star-shaped flowers. 3c. each; 20c. per doz.

OXALIS.

General favorites for hanging-basket and pot culture. Use a fine, sandy loam, and set three or four bulbs in a five inch pot. They soon start into growth if potted during August or September. The top should be kept near the surface and deep pots used, as the plants are liable through root growth, to lift themselves out. Abundance of water should be given during the growing season, and occasionally a little liquid manure. When going to rest withdraw the supply of water gradually, until finally the pots may be laid on their side until time to start them into growth again.

DECORATIVE PLANTS—Continued.

Kentia Belmoreana.

Latania Borbonica. (*Fan Palm*.) This is a typical palm and is more largely used than any other. It is of strong, healthy habit, and especially suitable for window culture. In $3\frac{1}{2}$ inch pots, 35 cents; 4 inch pots, 50 cents; 5 inch pots, \$1.00; 6 inch pots, \$1.50; 7 inch pots, \$2.50 each.

Pandanus Utilis. (*Screw Palm*.) Very decorative and useful for the window garden. The large leaves in leaving the stem, form a continuous spiral. It is a native of the Hawaiian Islands, where the natives use its fibre for making cloth. In 4 inch pots, 50 cents; 6 inch pots, \$1.00; 7 inch pots, \$2.00 each.

Asparagus Sprengeri. The beautiful green feathery sprays, which drop gracefully, are often 3 to 4 feet in length. Excellent for hanging pots. 25 cents to \$1.00 each.

Rubber Plants. (*Ficus Elastica*.) We can furnish nice, healthy plants of this favorite at from 50 cts. to \$5.00 each, according to size.

Asparagus Sprengeri.

Boston Fern.

Nephrolepis Exaltata Bostoniensis. (*Boston Fern*.) A very popular window plant. It bears well with heat, dust and neglect, and always has a bright, fresh appearance. Strong plants, 50 cents to \$2.00 each.

Japanese Fern Balls.

This beautiful Japanese novelty has already become very popular. The centre is moss, covered in an ingenious manner with fern roots. To start into growth, place the ball in a pail of water until thoroughly wet through, hang in a window and water two or three times a week. After watering, growth begins in a few days, and the ball soon becomes a mass of beautiful, green, lace-like foliage. Large size, 7 to 9 inches diameter, 50 cents each, net.

VIOLETS.

Imperial. Of vigorous growth; large deep blue, fragrant blossoms. Each .15 Per Doz. \$1.50 Per 100 \$10.00

Lady Hume Campbell. Very sweet; color light violet15 1.50 10.00

Marie Louise. The favorite10 1.00 8.00

Princess of Wales. Large, single flowers10 1.00 8.00

CHOICE LIST OF HARDY HERBACEOUS PERENNIALS.

These plants grow in beauty, size and value year by year. They require less care than most desirable flowering plants, and are adapted for nearly every condition. The months named indicate the time of flowering of each.

Achillea. (*The Pearl*.) Pure white, double. June. 2 ft., 15 cts. each; \$1.50 doz.

Anemone Japonica Rosea. Dark pink flowers in August and September. 2 ft., 15 cts. ea.; \$1.50 doz.

Aquilegia Chrysantha. Rich yellow. July. 3 ft., 15 cts. each; \$1.50 doz.

Arabis Alpina Plena. (*Alpine Rock Cress*.) (*Perennial, White Alyssum*.) White. May. 6 to 9 in., 20 cts. each; \$2.00 doz.

Aster Esme. Pure White. September. 2 ft., 25 cts. each; \$2.50 doz.

See Special Offers on Third Page of Cover.

HERBACEOUS PLANTS—Continued.

- Campanula Grandiflora.** (*Platycodon*.) Very dark blue. August to September. 2-3 ft., 20 cts. each; \$2.00 per doz.
- Coreopsis Grandiflora.** Golden-yellow. Summer. 2 ft., 15 cts. each; \$1.50 per doz.
- Delphinium Chinensis.** Intense blue. Summer. 2 ft., 20 cts. each; \$2.00 per doz.
- Eulalia Japonica Variegata.** A stately grass with green and white leaves. 6 ft., 25 cts. each; \$2.50 per doz.
- Gypsophila Paniculata.** Small white flowers in great profusion. Summer. 2 ft., 15 cts. each; \$1.50 per doz.
- Helianthus Multiflorus fl. pl.** (So called Hardy Dahlia.) Double yellow. August to September. 3 ft., 15 cts. each; \$1.50 per doz.
- Hibiscus Militar.** Salmon-pink. 5 inches across. August to September. 2-3 ft., 20 cts. each; \$2.00 per doz.
- Iris Kämpferi** (*Japanese Iris*). Named sorts. Beautiful colors. June to July. 2 ft., 35 cts. each; \$3.00 per doz.
- Lathyrus Latifolius** (*Perennial Pea*). Bright red. Summer. 5 ft., 25 cts. each; \$2.50 doz.
- Lupinus Polyphyllus.** Blue, pea like flowers. 4 ft., 25 cts. each; \$2.50 per doz.
- Lychnis Chalcedonica.** Brilliant scarlet. Summer. 2-3 ft., 20 cts. each; \$2.00 per doz.
- Myosotis Palustris Sempiflorens** (*Forget-me-not*.) Light blue. Summer. 15 cts. each; \$1.50 per doz.
- Papaver Orientale** (*Oriental Poppy*). Royal Scarlet. Scarlet. Small blotches. 2 ft., 35 cts. each; \$3.50 per doz.
- Phlox Decussata.** In variety. Many colors. Autumn blooming. 2-3 ft., 25 cts. each; \$2.50 per doz.
- Polemonium Richardsonii** (*Jacob's Ladder*). Sky blue with golden antlers; sweet-scented; all summer. 1½ ft., 25 cts. each; \$2.50 per doz.
- Rudbeckia Golden Glow.** Double golden-yellow; August to September. 5 ft., 15 cts. each; \$1.50 doz.
- Scabiosa Caucasica.** Lilac Blue. Summer. 2 ft., 25 cts. each; \$2.50 per doz.
- Yucca Filamentosa** (*Adam's Needle*). Early growth, drooping white flowers. 6 ft., 25 cts. each; \$2.00 per doz.

HARDY FLOWERING SHRUBS.

The Month After Each Sort Indicates the Time of Flowering.

- Almond.** (*Prunus Jap. Rubra fl. pl.*) Double pink flowers. 50 cts. May.
- (*Prunus Jap. Alba fl. pl.*) Double white flowers, beautiful. 50 cts. May.
- Althæa Purpurea Plena.** (*Rose of Sharon*.) *Hibiscus*. 35 and 50 cts. October.
- Striata.** Carnation striped. 35 and 50 cts.
- Althæa.** Double variegated. 35 and 50 cents.
- Double white. 35 and 50 cts.
- Azaleas.** Ghent Hybrids, perfectly hardy, and of many brilliant colors. Fine plants, \$1.00; large sizes, \$2.00 and \$2.50. June.
- Mollis.** A new type flowering earlier than the *Ghent*, and in color and form approaching the Indian varieties. 75 cts. to \$1.00
- Barberry.** (*Berberis Thunbergii*.) A low growing shrub of arching habit; the foliage changes to many brilliant colors in the fall. 50 cts. each. June.
- Purple leaved. 35 and 50 cts.
- Buttonbush.** (*Cephalanthus Occidentalis*.) Curious balls of blossoms all summer. 50 cts.
- Catalpa Aurea.** Golden foliage. 50 cts.
- Calycanthus Floridus.** Strawberry tree or sweet-scented shrub, dark flowers. 50 cts. each. June to September.
- Chionanthus Virginicus.** (*Fringe Tree*.) White. 50 cts. June.
- Clethra Alnifolia.** White, fragrant flowers, on spikes. 50 cts. July.
- Cornus Florida.** (*Dogwood*.) White. 50 cts. May.
- Rubra.** Rose 50 cts. May.
- Sanguinea.** (*Red Osier*.) Bark deep red. 35 cts.
- Elegantissima.** Variegated foliage. The leaves are marked with silvery white 50 cts.
- Corchorus Japonica.** (*Kerria*.) A small shrub with bright green leaves and clear yellow flowers. 25 and 50 cts. June and July.
- Desmodium Penduliflorum.** (*Sweet Pea Shrub*.) Red and violet pea-shaped flowers. 50 cts. Autumn.
- Deutzia Gracilis.** Compact, filled with starry white flowers. 35 and 50 cts. June.
- Crenata fl. pl.** Flowers double white, tinged with rose. 35 and 50 cts. June.
- Alba fl. pl.** With very double pure white flowers. 35 and 50 cts. June.
- Pride of Rochester.** A decided improvement on the *Crenata*; profuse bloomer. 50 cts.
- Elder, Golden.** (*Sambucus Aurea*.) Very effective for its bright yellow foliage. 15 and 35 cts.
- Eleagnus Longipes.** A new fruit-bearing ornamental shrub from Japan. 75 cts. July.
- Euonymus Atropurpureus.** (*Burning Bush*.) Purple. 50 cts. June.
- Exochorda Grandiflora.** A choice shrub of strong, upright growth, producing a profusion of large snowy-white flowers in June. 50 and 75 cents. May.
- Forsythia Suspensa.** Trained as a standard, it becomes one of the most beautiful weeping shrubs, covered with bright golden-yellow blossoms, early in summer. Dwarfs, 35 and 50 cts. April.

Weigelia.

FLOWERING SHRUBS—Continued.

- Genista Tinctoria.** (*Dyer's Broom.*) Covers the ground with a carpet of golden-yellow blossoms in June. 25 cts.
- Hydrangea Paniculata Grandiflora.** Flowers white in great pyramidal panicles, about a foot long. 50-75 cts. and \$1.00. August to October.
- Kalmia Latifolia.** A choice native evergreen shrub with shining foliage and dense clusters of pink or nearly white flowers. \$1.00 to \$1.50. June.
- Lilac.** (*Syringa.*) Bluish-purple flowers. 35 and 50 cts. May.
- (*S. Alba.*) Pure white. 50 cts. May
- Lonicera Tartarica.** (*Bush Honeysuckle.*) Pink, sweet-scented. 35 cts. May.
- Mock Orange or Syringa.** (*Philadelphus.*) Of compact habit, with creamy white flowers, deliciously fragrant. 35 and 50 cts. June.
- Manonia Aquifolia.** A handsome shrub with shining prickly leaves, and showy, bright yellow flowers in May, followed by large clusters of purple berries. 35 cts. May.
- Pyrus Japonica.** (*Cydonia.*) Japan Quince, flowers bright scarlet; very showy. 25 and 50 cts. May.
- Rhus Cotinus.** The well-known smoke bush. 3 ft., 50 cts.; 5 ft., \$1.00. June.
- Glabra Var. Laciniata.** (*Cut-leaved Sumach.*) The leaves are deeply cut like those of a *Sword Fern*, beautiful red in autumn. 75 cts.
- Snowball.** (*Viburnum Plicatum.*) A great improvement on the old-fashioned sort, with dark green foliage, and superb trusses of white flowers in midsummer. 50 and 75 cts. June.
- Spiraea Aurea.** Frequent pinching produces a deep golden-yellow color. 35 and 50 cts.
- Anthony Waterer.** One foot high. Crimson. 50 cts. June to October.
- Thunbergii.** Dwarf, flowers early; very pretty. 35 and 50 cts. April to May.
- Van Houttei.** The most profuse flowering of all the *Spiræas*, the bush being a mass of white bloom. 35 and 50 cts. June.
- Weigelia Rosea.** Well known; very free flowering. 35 and 50 cts. May to June.
- Variegata.** Fine variegated foliage, rosy-pink flowers. 50 cts. June.
- Lutea.** Yellow. 50 cts.

ROSES.

- Crimson Rambler.** Nice plants from 25 to 75 cents each.
- Hybrid Perpetual.** Leading varieties, strong plants, 50 cents each; \$4.00 per doz. Good flowering plants, 30 cents each, \$3.00 per dozen.

FRUIT TREES—Apples.

Summer.

- Astrachan.** Large, crimson, very early.
- Early Harvest.** Pale yellow, excellent, early.
- Golden Sweet.** Large, pale yellow, sweet.
- Williams.** Dark red, mild flavor.

Autumn.

- Walter Pease.** Larger, better flavored, more productive and longer keeper than the *Gravenstein*. Highest Quality. \$1.00 each.
- Gravenstein.** Large yellow, striped red.
- Fameuse.** (Snow Apple). Crimson, flesh white, excellent.
- Porter.** Medium, bright yellow, good.
- Pippin.** Fall, yellowish-green, very fine.
- Sops of Wine.** Medium, red, flesh white, mild.

Prices, 35, 50 and 75 cents, according to size, except as noted. Extra large trees, \$1.00 upwards.

Winter.

- Baldwin.** Large, dark red, productive, medium.
- Hunt's Russet.** Late yellow, good flavor.
- Hubbardston.** Large, yellow, splashed red, early.
- King.** Large, striped red, excellent.
- Lady.** Small, yellow and red, good.
- Northern Spy.** Large, striped red, good keeper.
- Rhode Island Greening.** Large, yellowish-green, medium.
- Roxbury Russet.** Extra quality, largest of the russets.
- Tolman's Sweet.** Medium, light yellow, excellent.
- Jacob's Sweet.** Best late-keeping sweet, splendid quality.

CRAB-APPLES.

- Hyslop.** October to January; deep crimson.
- Transcendent.** September, October; useful alike for preserving, pies, sauces and cider.

- Yellow Siberian.** Nov., Dec., large, golden yellow. Price 35 cts., 50 cts. and 75 cts., according to size.

See Special Offers on Third Page of Cover.

PEARS.**Summer.**

Clapp. Very productive; large, juicy.
Bartlett. Large, clear, yellow, juicy; late.
Giffard. Medium; greenish yellow, juicy.
Wilder. Ripens beginning August.

Autumn.

Beurre Hardy. October; Greenish russet.
Belle Lucrative Sept., yellowish-green, melting.
Bosc. October; large, russet, buttery.
Buffum. September; good for preserving.
Duchesse d'Angouleme. Oct., large, greenish.

Price: Standards, 5-6 feet, 75 cents. Larger or selected specimens, \$1.00 to \$2.00.

Louise Bonne. October, pale yellowish and red.
Seckel. Sept., small, dull brown, red-checked.
Sheldon. November, large, russet brown.
Vermont Beauty. October, yellow with carmine cheek.

Winter.

Anjou. Nov.-Jan.; greenish yellow, red cheek.
Dana's Hovey. November, small, rusty yellow.
Lawrence. January, medium, pale yellow.
Nellis. January, medium, of excellent quality.
Vicar. December, yellowish green; cooking.

CHERRIES.

Coe's Transparent. June; medium, pale amber and red.
Black Tartarian. June; large, purplish black.
Black Eagle. July; large, tender, rich, juicy.
Downer's Red. July; light red, tender and juicy.

May Duke. June; large, dark red, tender sub-acid.
Late Duke. July; large, dark red, sub-acid.
Yellow Spanish. Late June; pale yellow, red cheek.

Price, 75 cents and \$1.00 each.

HARDY GRAPES.

Concord. A large, handsome, popular grape. September.
Eaton. Large in berry and bunch, sweet and juicy. September.
Moore's Early. Large, reliable. August.
Wilder. (*Roger's No. 4.*) Sweet and solid. September.

Agawam. (*Roger's No. 15.*) Dark red, tender, juicy. September.
Brighton. Flesh rich, sweet and best quality. September.
Delaware. Small in berry and bunch, flesh very juicy. September.
Salem. (*Roger's No 22.*) Very rich flavor, large. September.

Green Mountain. Desirable in every way, very early. 50 cents.

Moore's Diamond. As early as Concord, large, fine flavored. 50 cents.

Niagara. As good as any, early and hardy.

Good plants, 30 cents each; \$3.00 per dozen. Strong plants, 50 cents each; \$5.00 per dozen, except as noted.

STRAWBERRIES.

We beg to draw especial attention of planters to the **extra quality** of our pot-grown Strawberry Plants, and to the care exercised in growing, lifting and packing them. We take every care to produce large, healthy and well rooted plants, and we recommend them with every confidence to those desiring a crop of the choicest fruit quickly and with the least trouble or chance of failure.

The earlier they are planted the larger the first season's crop will be. The plants may be set in beds of three rows, one foot apart, and one foot distant in the rows, with a space of about three feet between the outside rows of adjoining beds left for a pathway, or they may be planted in rows three feet apart and one foot apart in the rows.

Where the winters are severe, with little snow for protection, a light covering of leaves or salt hay, or the branches of evergreens will be of great service. This covering should not be placed over the plants until the ground is frozen, say from the middle of November till the beginning of December. The covering should be removed in Spring just as soon as the plants begin to grow.

The sorts marked (P) are pistillate, and will not fruit alone, but should be planted beside some staminate or perfect flowered variety.

Parson's Beauty. (P). Large, bright berry; good quality. Productive, medium.

Senator Dunlap. (P). One of the best for home garden; splendid bearer. Early.

Brandywine. Very hardy; scarlet. Medium season.

Minute Man. The most productive yet introduced. Fruit crimson; fine quality. Medium.

Marshall. Large, deep crimson, fine flavor. Late.

Sample. (P). Large, prolific, delicious; bright red. Late.

Per 100, \$2.50; per 1,000, \$22.50 net.

Commonwealth. \$1.00 per doz.; \$5.00 per 100.

LAYER STRAWBERRY PLANTS.

Ready for Shipment about the 1st of October.

We can furnish the above, and these sorts: **Bismarck, Challenge, Rio, Minute Man, Gandy, Glen Mary** at \$1.00 per 100; \$8.00 per 1000.

See Special Offers on Third Page of Cover.

BRECK'S STANDARD LAWN GRASS.

By the courtesy of Mr. Thomas W. Lawson, Boston, Mass., we reproduce here a view of his beautiful country seat, Dreamwold, at Scituate, Mass. The fine lawn shown here is the product of Breck's Standard Lawn Grass Seed. The photograph was taken about three months from the time the seed was sown.

We have given much thought and made many experiments in order to ascertain just what is the best mixture for permanent lawns, and the grasses which are best suited to this climate. By the proper blending of the varieties which constitute Breck's Lawn Grass, we have obtained a mixture that from early spring to late fall will give to lawns made with it that rich, deep green so often admired upon the lawns and parks of England, but so seldom seen in this country. One quart will sow 300 square feet. Price, per qt., \$0.25. One peck will sow 2,400 sq. feet. Price, per pk., \$1.25.
 " half pk. will sow 1,200 " " " ½ pk., .75. " bushel will sow 10,000 " " bush., 4.00.
 Four bushels will sow one acre.

Boston Park Lawn Grass.

The same mixture of grasses and clover as supplied by us to the City of Boston Park Commissioners for sowing on the Franklin and other parks administered by them. Per lb. 30 cents — will sow 680 sq. feet. 16 lbs. \$4.00 — will sow one-quarter acre. 64 lbs. \$15.00 — will sow one acre.

When desired we make special mixtures of grasses to suit different soils and conditions.

Breck's "Shady Spot" Lawn Grass.

This is a mixture of grasses that are naturally adapted for growing under trees and in places where the sun does not find ready entrance. If sown on such locations, in place of the ordinary Lawn Seed, bare and unsightly spots will be prevented. Per qt. 25 cts.; pk. \$1.25; bush. \$4.00.

Breck's Bank and Terrace Grass Mixture.

A mixture of deep-rooting grasses specially prepared for embankments and situations where it is impractical to get a successful catch of the less spreading rooted sorts. It produces a rich velvety turf throughout the season. No coarse-growing undesirable varieties are used in this mixture. Per qt. 25 cts.; pk. \$1.25; bush. \$4.00.

All seeds and other goods purchased of you the past season were very satisfactory. Your lawn grass seed is of a superior quality in germinating and producing a rich, deep green sward. I had to mow in thirty days after planting.

DAVID WEIR, Supt. to Mrs. C. F. Sprague, Brookline, Mass.

See special offer on third page of cover.

Prestwick Golf Grasses.

A series of mixtures, modified as experience warrants for our needs, that we are sure surpass any hitherto offered in the United States. No. 1.—For Putting Greens, sow at the rate of 80 lbs. per acre. Per lb., 16 cts. No. 2.—For Courses, light and dry soils, sow at the rate of 50 lbs. per acre. Per lb., 14 cts. No. 3.—For Courses, low and damp soils, sow at the rate of 50 lbs. per acre. Per lb., 10 cts.

SUNDRIES.

Goods listed under the heading of "Sundries" are not subject to either of our Special Offers.

**Hyacinth Glasses.**

The Hyacinth Glasses we offer are of American Manufacture. They are of better shape and in more desirable colors than the imported Belgian glasses usually sold.

	Each	Per Doz.
Ordinary Tall Shape. Green, blue and amber	\$0.15	\$1.50
Tye's Style. (Shape of Cut.) Green, blue and violet.	.20	2.00

Soil, Peat, Leaf Mould, Etc.

Prepared Potting Soil. Specially prepared with peat, leaf mould, loam, sand and fertilizer. Pk., \$0.30; bush., \$1.00; bbl., \$2.00, net.

Peat, Rotted Fibrous. Fine, light and sweet. For some varieties of plants this is invaluable. Pk., \$0.30; bush., \$1.00; bbl., \$2.00, net.

Leaf Mould. Vegetable humus, a desirable addition to all soil used for potting. Pk., \$0.30; bush., \$1.00; bbl., \$2.00, net.

Silver Sand. For rooting cuttings and mixing with potting soil. Pk., \$0.50; bush., \$1.50, net.

Fern Root or Orchid Peat. bush., \$1.50; bbl., \$3.00, net.

Sphagnum Moss. Per bag of 2 bush., \$1.00.

Breck's Vegetable Fibre.

A chemically prepared vegetable fibre, rich in plant food. Its peculiar character especially adapts it to induce root growth and cause healthy, vigorous plants. For potting bulbs use one-third Breck's fibre to two-thirds of the usual soil preparation and you will be surprised at the results. Breck's Fibre is unsurpassed as a medium in which to sprout seeds. Price, 5 lbs., 30 cents; 15 lbs., 50 cents; 25 lbs., 75 cents; 50 lbs., \$1.00; 100 lbs., \$1.50.

Scotch Soot.

This is much used by florists and gardeners, both as a fertilizer and fungicide. Mixed with Flowers of Sulphur (two-thirds soot, one-third sulphur), there is nothing better to prevent and cure mildew. Used as a fertilizer, either in dry state or liquid, it quickly promotes growth, and heightens the color of both flower and foliage. Per 100 lb. bag, \$2.50; 25-lb. bag, \$1.00, net.

Sheep Manure.

This is a pure, natural manure, and nutritious food for plants. Its effect is immediate. It is the best of all manures for mixing with the soil for greenhouse plants—one part manure and six parts soil. Price, in 5 lb. pkgs., 25 cts.; 10 lb. pkgs., 40 cts.; bags of 100 lbs. each \$2.00; per ton, \$35.00.

See Special Offers on Third Page of Cover.

Goods under the heading "Sundries" are not subject to either of our Special Offers.

Mats, Hot Bed.

Made in a first-class manner from selected Rye Straw. The twine used is especially prepared for the purpose and is very durable. Size 6 x 6 ft., \$1.75; 3 x 3 ft., \$1.25. Special sizes made to order.

Hot Bed Sash.

Extra well made from thoroughly seasoned lumber, glazed and painted. Size, 1½ in. x 3 x 6 ft., \$2.85; 1¾ in. x 3 x 6 ft., \$3.00.

Hot Bed Sash and Frame, complete, size, 3 ft. 1 in. long, 4 ft. 8 in. wide. Easily put together and thoroughly serviceable. Price \$6.00 net.

HYACINTH OR BULB POTS.

These are made extra deep so as to admit of complete root growth, and prevent the bulb from being thrown up as sometimes happens when set in an ordinary flower pot.

8 "10	1.00	7.60	18 "40	4.50	35.00
9 "10	1.05	8.20				

The three sizes last quoted are *deep and serviceable*. *Shallow dishes* can be supplied at a lower price.

FIBRE SAUCER TRUCKS FOR LARGE POTS AND TUBS.

These are made of Indurated Waterproof Fibre Ware, mounted on castors. They are a great convenience for using with the larger size pots and tubs. Being perfectly waterproof, they are especially suitable for use in parlors, halls, etc. The four smaller sizes have a detachable and strongly made metal base, so that a new saucer can be substituted when one is worn out or broken. The two larger sizes have the castors attached to the bottom.

	Each	Doz.		Each	Doz.
12-inch diameter, 3 castors	\$0.60	\$6.00	18-inch diameter, 4 castors	\$0.95	\$10.00
14 " " 3 "70	7.20	20 " " 4 "	1.15	12.00
16 " " 4 "85	9.00	22 " " 4 "	1.40	15.00

The 12-inch size is suitable for a 10-inch pot, the 14-inch for a 12-inch pot and so on.

PLANT STANDS.

Wire, Rigid. These stands are most desirable, either for house use or for conservatories. They are elegantly made, painted a beautiful green, mounted on porcelain castors and finished with gold bronze, making them very attractive and ornamental.

No. 4.

No. 1. Oblong Stand, 24 in. high, 30 in. long, 9½ in. wide. \$2.50.

No. 2. Square Stand, with two shelves, 33 in. high, 18 in. deep, 33 in. long. \$3.25.

No. 3. Is like No. 2, but has three shelves, 36 in. high, 24 in. deep, 33 in. long. \$4.00.

No. 4. Semicircle Stand, 36 in. high, 26 in. deep. \$4.00.

We manufacture Wire Plant Stands to fit special windows and other locations. When ordering be careful to send correct measurements.

No. 2.

Wire Window Shelf. (See Cut.) With adjustable steel brackets. 36 in. long, with brackets complete, \$1.00; each additional foot, 25 cts.

Flower Pot Brackets. Especially adapted to plain flower pots and saucers. It is the most practical article for the purpose that has ever been offered. The cut herewith shows the idea. The steel clasp or frame in which the pot and saucer sit is of such a form as to hold them securely. They are made throughout of flat steel, perfectly strong and can be fastened on the narrowest moulding. Black finish.

	Length of Arm	Clasp to hold	Price each	Price per doz.
No. 1	8 in.	5-in. pot	30 cts.	\$3.00
" 2	10 "	6 "	35 "	3.50
" 3	12 "	7 "	40 "	4.00

BRECK'S FLOWER FOOD.

A safe, clean, odorless, concentrated plant food that is soluble in water. It promotes a healthy, vigorous growth of wood, leaf and flower.

No. 1, sufficient for 30 plants for one year, 25 cts.; by mail, 40 cts.

No. 2, sufficient for 30 plants for 3 months, 15 cts.; by mail, 20 cts.

We furnish with each package a practical treatise of 32 pages, on the care of house plants, "*Success with House Plants*."

Sprinkler, "Ladies' Favorite." This is the most practical sprinkler yet offered to use on house plants, cut flowers or for the laundry. Each, 75 cents.

Sprinklers, Scollay's Rubber. An indispensable article for showering plants, sprinkling bouquets, dampening clothes, etc.; three sizes, 50 cts., 75 cts. and \$1.00 each.

See Special Offers on Third Page of Cover.

INSECTICIDES.

Insecticides are not subject to either of our Special Offers.

- Aphis Punk, Nikoteen.** A special preparation of nicotine for the extermination of green and black fly, thrip, etc.; contains no ammonia and does not injure delicate plants. Per box of one dozen rolls (720 grains nicotine) 60 cts.
- Canker Worm Exterminator.** (*Morrill's Tree Ink.*) A sure protection to trees from the ravages of grub and canker worms. Directions with each can. 2-lb cans, 30 cts.; 3-lb cans 45 cts.; 5-lb. cans, 60 cts.; 10-lb. cans, \$1.10; 20-lb. cans, \$2.00; 28-lb. cans, \$2.80; 125-lb. kegs, per lb., 9 cts.; 460-lb. barrels, per lb., 7 cts.
- Fir Tree Oil.** (*Soluble.*) An invaluable preparation for destroying all insects and parasites that infest fruit trees, plants and animals, whether on foliage or at the roots of the plants. Per gal., \$4.00; per qt., \$1.25; pt., 75 cts.; $\frac{1}{2}$ pt., 50 cts.
- Lemon Oil.** An oil that is readily soluble in water. It destroys insects and parasites of all kinds without injury to plants. Much used for palms and other ornamental foliage plants. Pt., 50 cts.; qt., 80 cts.; gal., \$2.25.
- "Nico-Fume"** is especially effective against Aphides ("Green Fly" and "Black Fly"), and against all insects affected by tobacco. "Nico-Fume" is packed in special friction-top tins and is sold as follows: 24 sheets, 75 cts.; 144 sheets, \$3.50; 288 sheets, \$6.50.
- Nikoteen.** Put up in pint bottles; each bottle contains all the nicotine obtained from 200 pounds tobacco stems. A cheap, clean and safe insecticide. Can be applied by fumigation, or applied locally, diluted as a spray. Pint bottle, \$1.50.
- Scap, Pinners Tobacco.** Manufactured from the essential oil of tobacco, for the destruction of all insects, parasites and their eggs. Per lb., 50 cents; $\frac{1}{2}$ lb., 30 cts.
- Soap, Whale Oil.** For destroying insects on plants, trees, vines, etc.; for washing down the bark of trees, grape vines, etc. In boxes, 1 lb., 15 cts.; $2\frac{1}{2}$ lbs., 35 cts.; in buckets of about 14 lbs., \$1.75.
- Soap, Sulpho-Tobacco.** (Patented.) A superior insecticide and fertilizer. Non-injurious to the tenderest growth. Kills all insect life in the window-garden. 3 oz. cake, 10 cts.; 8-oz. cake, 20 cts.; 10-lb. can, \$3.00.
- Soap, Fir Tree Oil.** This article contains no poison, yet it is quite effective in destroying red spider, mealy bug, aphis, etc. It can also be used in the garden against potato bugs, cabbage worms, currant worms, black fly, etc. $\frac{1}{2}$ -lb. tin, 25 cts.; 2-lb. tin, 75 cts.
- Tobacco Extract.** (*Rose Leaf Brand.*) A perfectly pure aqueous extract, highly concentrated and always uniform in strength of nicotine poison. Destroys green fly, mealy bug, red spider and scale. Pt., 25 cts.; qt., 45 cts.; 1 gal., \$1.10; 5 gals., \$4.50.
- Tobacco Stems.** For fumigating. If used as a mulch around sweet peas and other plants they prevent the destructive work of the wire and cut worms. \$1.00 per bbl.; \$2.50 per bale.
- XL-All Liquid Insecticide.** For Syringing, spraying, dipping or sponging. Destroys all insects, especially effective against mealy bug and red spider. Can be used without injury in graperies, even when the fruit is in an advanced stage of growth. Pt., 65 cts.; qt., \$1.00.
- XL-All Vaporizing Compound.** This is an English preparation, that at the first glance has a high-priced appearance. The safety with which it can be used, its never failing effectiveness and the ease with which it can be applied as an insecticide place it at the head of the first rank. It is cheaper, results considered, than any other vaporizing compound, and there is no other like it. Its action is positive on *Mealy Bug, Thrip and all kinds of Aphis*. Price, per bottle No. 1, \$6.50; No. 2, \$3.25; No. 3, \$1.65; No. 4, 90 cts. Smallest bottle is sufficient to fumigate 5,000 cubic feet.
- Fumigators.** With lamp for vaporizing; large, \$1.00; medium, 85 cts.
- Lehman's Heaters.** Put one of these heaters in each poultry house on cold nights and there will be no frozen combs. The use of Lehman's Heaters and Coal is no longer an experiment. Their practicability and usefulness have long since been demonstrated. The fact that 125,000 Heaters are in actual use, with an average yearly sale of 10,000 Heaters and a half million pieces of coal, speaks more for their merits than thousands of testimonials.

Lehman's Heater (except No. 10) is a metallic case $7\frac{1}{4}$ inches wide, $3\frac{1}{2}$ inches deep, and from 14 to 20 inches in length. The top is oval, giving the feet a comfortable resting place. These Heaters, which are furnished with carpet coverings, have a lining of asbestos cloth between the carpet and the heater, making it perfectly safe from scorching. The No. 10 Heater is especially adapted to vans and large delivery wagons and *Poultry Houses* where an unusual amount of heat is required. The No. 3 and No. 4 Heaters are our Standard Heaters, which we specially recommend, as they are packed with a special composition which retains the heat and makes them more durable. *Net Prices.*

**To Raise Healthy Chicks
Use
Breck's Hygienic Brand
Chick Food.**

**To Make Hens Lay
Use
Breck's Complete Poultry
Feed.**

Breck's Hygienic Brand Chick Food.

A scientifically proportioned mixture which will meet every demand of the growing chick, and supply, without excess of fat, the food necessary to produce and sustain vigorous health. There is nothing in this preparation that is at all likely to induce indigestion or diarrhoea, but on the contrary, it is so balanced in its constituents as to in a large measure make these troubles impossible where cleanliness and proper brooding conditions exist. It also contains the bone-forming properties that prevent leg weakness. It is high in protein, the flesh and muscle forming elements. There is sufficient mineral material to supply the needs of the bone structure of the rapidly growing chicks, while it is low in carbohydrate, the fat-forming element, which, where in excess, causes sickness and loss.

No other feed is necessary for the first eight or ten weeks. Feed dry. 50 lb. bags, \$1.35. 100 lb. bag, \$2.50.

Breck's Complete Poultry Feed.

We have frequently been asked by many of our patrons to put up in a convenient form a complete Poultry Feed. In response to the above requests, after a great many experiments, we offer in **Breck's Complete Poultry Feed** what we believe is the best food for poultry that is on the market to-day.

Great care has been exercised in the selection and balancing of the materials of which it is composed. It is being used in large quantities by many of the most successful Poultry Raisers in New England, and is without doubt the best Food of the kind sold at the present time. Feed dry. 50 lb. bags, \$1.25. 100 lb. bags, \$2.25.

In placing on the market Breck's Hygienic Brand Chick Food you have filled a long felt want among chicken raisers. As the name indicates, my chickens were healthier after feeding from the Hygienic Brand than from any other kind ever used.

W. A. BLODGETT,

South Lincoln, Mass.

The "Breck's Complete Poultry Feed" which we have been buying of you, our customers tell us is producing fine results and our sales are increasing rapidly on it. We believe it to be one of the best all round Poultry Foods.

ALDERMAN & CARLISLE, North Adams, Mass.

Breck's Hub Poultry Fountain. This fountain is made of the best galvanized iron, is very strong, easily cleaned, quickly filled, and is equally serviceable for both chickens and adult fowls. (See cut.) $\frac{1}{2}$ gal., 50 cents each; 1 gal., 75 cents each; 2 gals., \$1.25 each. Special prices per dozen or 100 upon application.

"E. H. M." Stone Fountains. Made of glazed stoneware, in two pieces; a saucer and an inverted cup, finished off on top to prevent roosting. Strong, cheap, easily cleaned and quickly filled. The best stoneware fountain yet offered. The one quart size is specially suitable for pigeons. 1 qt. 20 cts.; 2 qts. 25 cts.; 1 gal. 30 cts.; 2 gals. 45 cts. Net.

Stone Drinking Fountain. This fountain is of the best patent stoneware and is very desirable.

1 " "	" " .35
2 " "	" " .40

Poultry Supplies, except as marked Net, are subject to offer No. 1 in N. E. Outside of N. E. offer No. 3 only applies.

For complete list of Poultry Supplies see our publication "Points for Poultry Raisers."

See Special Offers on Third Page of Cover.

WOULD YOU PICK A PLUM?

\$1.00

WE HAVE ARRANGED,

\$1.00

in conjunction with Doubleday, Page & Company, the publishers of the new **Garden Magazine**, now acknowledged to be the representative American gardening periodical, to offer this One Dollar publication for six months (including special and double numbers) and the most helpful and up-to-date book on **How to Plan the Home Grounds**, by Samuel Parsons, Jr. (One Dollar edition in cloth), to our customers, postpaid, for a very low sum.

We can say but a few words in this limited space about the magazine and book. The former is an *up-to-date encyclopedia of gardening*. The latter is a complete general guide to planting. Together, we believe they are absolutely the largest value worth any gardener or home-builder could buy. They are sold separately everywhere at full price. Our customers get them both for \$1.00 if they speak now.

You will certainly, sooner or later, buy the book or the magazine. Why not take advantage of this greatly reduced price?

THE GARDEN MAGAZINE is already too well known to require a description on this page. It is by far the most beautiful, helpful and readable periodical on gardening. It will be even larger and better for the coming year, a constant reminder and guide for the growing of flowers, vegetables and fruits, in many superbly illustrated articles and twenty-five regular departments. We can only suggest two of the twelve timely numbers.

FALL PLANTING NUMBER (ready September 15th). Millions of dollars are sent each year, when autumn comes around, for bulbs, hardy plants and trees. More and more expert gardeners plant in the fall. *Hardy plants and bulbs put carefully into the ground in the fall are ready to take advantage of the early spring season, and get vastly better results.*

\$1.00 a year. 10c. a copy

DOUBLE NUMBER

For April

With the pace set by the great Planting Number last April, it will easily be the most important and helpful garden publication of the year.

"Would not take \$50 for my April number if I could not get another," says one man who enjoys the pleasures of a good garden.

CONTENTS: Selection of Home Grounds; Selection of a House Site; Roads and Paths; Lawns; Flower Gardens; The Terrace; Plantations; Deciduous Trees and Shrubs; Evergreen Trees and Shrubs; Hardy Herbaceous Plants; Aquatic Plants; Hardy Vines and Climbers; Bedding Plants; Pools and Streams; Woodlands; The Use of Rocks; Residential Parks; Fences, Bridges, and Summer Houses; Plants for General Use on Home Grounds; Contracts and Specifications; Parks and Parkways; Churchyards and Cemeteries; Seaside Lawns; City and Village Squares; Railroad and Station Grounds.

HOW TO PLAN THE HOME GROUNDS

Samuel Parsons, Jr., the author, is a Fellow of the Society of American Landscape Architects, and was for years Superintendent of the New York Parks. He gives practical directions not only for laying out the home grounds, selection of site, the care and making of roads and paths, lawns, woodlands, hedges, gardens, selection of plants and trees, etc., but also in a second section he treats of the village improvements, designed to elevate public taste, as it concerns the highways, the schoolhouses, the stations, and the village outdoor life generally.

Size, 5 x 7½; pages, 249; illustrations, 56; binding, cloth; price, net, \$1.00

BRECK'S REAL ESTATE AGENCY

CONNECTED WITH THEIR

Seed Store and Agricultural Warehouse

(ESTABLISHED 1822)

51 & 52 NORTH MARKET ST. ✱ BOSTON, MASS.

WE BEG TO CALL your attention to our real estate department established last February, for the convenience of our patrons and the public.

Persons wishing to buy, sell, lease or mortgage their properties, or those having money to loan on real estate, are invited to call or communicate with us.

Those wishing to sell, lease or mortgage their properties will be supplied with blank forms, that a complete description may be filed with us. Persons desiring to purchase or lease realty will also be supplied with proper blanks, that they may readily give us an idea of what is wanted.

The commissions charged for the transaction of any business are the same as those established by the Boston Real Estate Exchange, of which we are members.

We offer our patrons the convenience of our office at all times, and trust they will not hesitate to get our expert advice when about to sell or purchase real estate.

As the same careful supervision and liberal policy is as characteristic of Breck's Real Estate Agency as obtains throughout our business generally, we believe we can be of the utmost service to you as real estate agents, and therefore solicit your favors.

Very respectfully,

TELEPHONE, RICHMOND 1660

SALESWOMEN,
YOUNG WOMEN FOR OFFICE WORK,
MATRONS,
NURSES, ETC.

When this Bureau was established in 1890 our purpose was to secure to employers a better class of help than they had been obtaining.

Its rapid growth and many voluntary statements testify to its convenience and the high grade of employees furnished.

We mail free on application circulars descriptive of our Bureau, and blank forms whereon employers can state particulars necessary to guide us in selecting suitable employees.

Our Bureau of Registry and Information has certainly improved and elevated the service, and we believe it will continue to do so, besides supplying a long-felt want.

Through our large clientage we can serve both employer and employee more promptly and satisfactorily than can any house not having our resources.

The knowledge gained through experience is at the service of employers who desire our aid or advice in the selection of suitable persons for the places they wish to fill.

Bear in mind that no person is sent out from this office whose previous record for character and habits has not been carefully investigated and approved.

In order that Breck's Bureau might be most conveniently located for our mercantile patrons, both men and women, we have recently secured commodious quarters at No. 406 Washington St., which we have fitted up in an appropriate and attractive manner. Here our manager, Mr. Wm. E. McGerige, with an experienced and courteous corps of assistants, is prepared to give the best service in Boston or the country to all persons desiring employees or employment in mercantile lines.

We take this opportunity to thank our customers for the business given us, and to invite those who have not as yet patronized our Bureau to do so, and give us an opportunity to practically demonstrate the benefits to be derived from its use.

Yours respectfully,

Remember the Number:

Ross Ensilage and Fodder Cutters.

For 50 years the Ensilage and Fodder Cutters built by the E. W. Ross Co., of Springfield, Ohio, have stood ahead of all others for effectiveness, durability and quality. Many improvements have been made, and at the present time there does not seem to be a great deal of room for further improvement. They are built in all sizes, from the small hand machine to the immense machines requiring 10 to 15 horse power to run them, and having a capacity of 35 tons of ensilage per hour. Be sure to see them before purchasing.

Cutters at all prices ranging from \$4.00 to \$500.00. Descriptive catalogue mailed on application.

Mann's Bone Cutter.

The Mann's Green Bone Cutter is offered to the poultry world on a warranty to produce a perfectly edible poultry food, with no waste, from any average lot of butcher's

bones with less labor and less annoyance than any other bone cutter.

Union Lock Poultry Fence.

The Union Lock Fence, as the name implies, is securely locked at every intersection, so that it is impossible to pull it apart at the joints. All widths have 1 1/4 in. mesh from the bottom to the seventh cable, so that the smallest chicks may be confined. It will not sag or slack as poultry netting does, and is the neatest, most durable and economical fence on the market.

GAS AND GASOLINE ENGINES.

The limited space in this Catalogue does not permit us to illustrate or describe the line of Gas and Gasoline Engines which we are handling.

To those interested we will on application mail complete Catalogue giving full information. We offer only high grade Engines, which our experience teaches us are the most economical to buy. If contemplating purchasing a Gas Engine don't fail to write for our Engine Catalogue.

See Special Offers on Third Page of Cover.

Horton Rotary No. 12

Clothes Washers.

Our Horton Rotary Washer and the American Washers are guaranteed to be perfect in every respect.

Any woman can operate the Horton Rotary with ease; it closes tight, preventing the escape of steam, and retains the heat in the water.

Both the Rotary and American Washers are made from best grade Louisiana Cypress; handsomely finished in natural wood; strongly built and thoroughly braced.

If they do not prove all we claim for them, they can be returned and the money paid refunded. All we ask for is a trial.

**Gem Food Choppers.**

The Gem is the best food chopper made; that we guarantee, because it has been demonstrated by actual use in many kitchens.

It takes the place of chopping bowl and knife, and relieves the housekeeper of much work; saves time, and is altogether a great kitchen convenience.

PLEASE READ THIS BEFORE MAKING UP YOUR ORDERS

SPECIAL OFFERS

Carriage Paid or 10 Per Cent Discount allowed

We make the following offers on all orders made up from our HOLLAND BULB AND PLANT CATALOGUE FOR 1905, at the net cash prices therein stated (except as noted), SENT US BY MAIL OR EXPRESS, ACCOMPANIED BY CASH.

OFFER No. 1

We will send GOODS PREPAID by Mail, Express or Freight, as we may deem advisable, TO ANY CITY OR TOWN IN NEW ENGLAND.

OFFER No. 2

We DELIVER all Bulbs at single and dozen prices quoted in this Catalogue, to ANY POST-OFFICE in the United States, except the few heavy Species which are marked net.

OFFER No. 3

On all orders (except as noted) WHERE CUSTOMERS PAY TRANSPORTATION CHARGES THEMSELVES, we will allow A DISCOUNT OF TEN PER CENT.

PLEASE REMEMBER

That orders sent in early SECURE THE FIRST SELECTIONS.

That our SPECIAL OFFERS are POSITIVELY LIMITED to ORDERS BY MAIL or EXPRESS ACCOMPANIED BY CASH, postal note, draft on New York or Boston, stamps, express or post-office money order.

That "Special Offers Nos. 2 and 3" are especially advantageous to PARTIES LIVING OUTSIDE of New England. When goods are not mailable, in a majority of cases the 10 per cent discount will offset transportation charges.

PLEASE NOTE

We offer such extraordinary inducements for orders sent us by mail or express, accompanied by cash, because we can execute them in the quiet of our mail order department with promptness, despatch, and with goods of the highest excellence, and increase the volume of our business without impairing the efficiency of its service.

OUR 1906 General Catalogue will be published early in January. A copy will be mailed free to all applicants, and to customers of this year without ordering it.
